SUSANNA PIQUER-BARRACHINA

Urbana-Champaign, IL • +34 602 219 241 • susannapiquer@gmail.com • linkedin.com/in/susanna-piquer

J-1 Student Visa • Authorized for UIUC On-Campus & Research Park Employment (up to 20 hrs/week)

EDUCATION

Universitat Politècnica de València, Valencia, Spain — expected 2027
B.S. in Data Science — Major GPA: 8.5/10.0 (∼3.5/4.0 U.S. GPA)
Awarded Highest Academic Honors (Top 1 of class in 2 subjects)

University of Illinois Urbana-Champaign, Champaign, IL — Aug 2026 - May 2027
Exchange Student, Grainger College of Engineering

Center for Digital Technology & Management (CDTM), Valencia, Spain — Jan 2026 - present
Honors Program in Technology Management

RELEVANT COURSEWORK

Data Structures and Algorithms
Natural Language Processing & Information Retrieval
Infrastructure for Data Processing
Databases and Data Management
Descriptive and Predictive Models (Machine Learning)
Data Security
Model Evaluation, Deployment & Monitoring
Continuous Modeling and Simulation

EXPERIENCE

AI Engineer, *Sherpas Wealth Technology, Valencia, Spain* — Jun 2026 - Aug 2026
- Architecting and deploying scalable AI cloud infrastructure and backend logic to support intelligent financial data workflows.
- Integrating advanced LLMs and transitioning core services using Go (Golang) and Python to optimize production efficiency.

CEO & Co-Founder, *Octocypher Seguridad Informática S.L.* — Mar 2025 - May 2026
- Led the transition of a technical cybersecurity project into a legally constituted startup, defining the strategic roadmap.
- Pitched to investors at Valencia Digital Summit and won 1st prize (€5,000 seed capital) in the Cybersecurity Startup Program 2025.

Data Strategy Consultant (Project), *Improven, Valencia, Spain* — May 2026 - present
- Collaborating on high-impact consulting projects, applying Agile methodologies to streamline workflows and deliver data-driven business solutions.
- Bridging the gap between technical data analysis and strategic decision-making for corporate clients.

Technology Trend Consultant, *IMED Hospitales & CDTM, Valencia, Spain* — Mar 2026 - Apr 2026
- Conducted a comprehensive Trend Seminar focused on the future of healthcare, identifying key shifts and innovation opportunities.
- Delivered strategic conclusions to executive board members, translating complex technical trends into actionable business insights.

RELEVANT DATA PROJECTS

Financial Regime Detection via Anomalous Diffusion | *Deep Learning & Time Series* — May 2026
- Architected AnDiMultiTaskChangepointNet, a hybrid Conv1D and BiLSTM neural network built in PyTorch to detect structural market crashes. Designed a Multi-Task Learning framework that simultaneously extracts the anomalous diffusion exponent and classifies the stochastic physical model, overcoming pre-trained model "Scale Myopia".
- Achieved a changepoint localization RMSE of 16.85 days over a 252-day window and deployed an interactive early-warning dashboard using Streamlit.

Multimodal Sexism Detection System (EXIST 2026) | *NLP & Computer Vision* — May 2026
- Developed CAS-Net, an architecture featuring Biometric Decoupling to process text (XLM-ROBERTa), visual features (CLIP), and physiological signals.
- Implemented a learned Gated Fusion mechanism to dynamically weight modalities, resolving visual irony and achieving an F1-Macro of 0.7102 on the official test set.

Clinical Disease Predictive Model | *Machine Learning & Analytics*
- Developed a binary classification model (Scikit-Learn, Pandas) to predict disease onset from noisy, imbalanced clinical datasets. Implemented a Random Forest algorithm, achieving a stable Average Precision (AP) of 0.58 and successfully preventing overfitting.

Enterprise Time Tracking Platform (Private Client) | *Cloud Architecture*
- Architected a regulatory compliance full-stack application using PythonAnywhere and SQL, provisioning scalable cloud environments (AWS & Docker) and leveraging AI-assisted workflows (Gemini CLI) to streamline secure data migrations.

SKILLS

Design & Programming: Python, R, SQL, Go, Java, Tableau, Power BI
Cloud & Data Eng: AWS, Docker, PyTorch, MLflow, Streamlit, Relational/NoSQL Databases
Data Science & AI: Machine Learning, Deep Learning, NLP, Computer Vision (CLIP), Time Series, RAG
Languages & Workflow: Spanish (Native), English (C1, TOEFL), Agile Methodology
Honors & Leadership: Elite Athlete (Valencian Pilota) | Former Treasurer & Board Member (ACM UPV Chapter)
