SUSANNA PIQUER-BARRACHINA

+1 217 390 3173 • susannapiquer@gmail.com • linkedin.com/in/susanna-piquer-barrachina • github.com/spiqbar

Education

University of Illinois Urbana-Champaign, Grainger College of Engineering **Expected May 2027**
Exchange Student, Data Science & Computer Engineering

Universitat Politècnica de València **Expected 2027**
B.S. in Data Science | GPA: 8.5/10.0 (∼3.5/4.0 U.S.) | Highest Academic Honors (Top 1 of class, 4 subjects)
Coursework: Machine Learning, NLP & Information Retrieval, Continuous Modeling & Simulation, Model Evaluation & Deployment, Data Security, Infrastructure for Data Processing

Center for Digital Technology & Management (CDTM) **Jan 2026 – Present**
Honors Program in Technology Management

- Ran healthcare technology trend seminar with IMED Hospitales for executive board members
- Advised Improven on a data strategy project, applying Agile methods with a small consulting team

Experience

Sherpas Wealth Technology | *AI Engineer* **Jun 2026 – Aug 2026**

- Set up cloud infrastructure for real-time financial data pipelines used by advisor-facing tools
- Rewrote core backend services in Go, replacing a legacy Python stack under live traffic
- Shipped LLM-based reasoning pipelines that now run in production

Octocypher Seguridad Informática S.L. | *CEO & Co-Founder* **Mar 2025 – May 2026**

- Grew cybersecurity startup from technical concept to legally incorporated company
- Won 1st place and EUR 5,000 pitching to investors at Valencia Digital Summit

Relevant Data Projects

Financial Regime Detection via Anomalous Diffusion | *Deep Learning, PyTorch* **May 2026**

- Built AnDiMultiTaskChangepointNet, a Conv1D-BiLSTM network with a Bayesian uncertainty layer
- Trained it to jointly predict the diffusion exponent and the underlying stochastic model
- Anticipated volatility spikes with 16.85-day RMSE, deployed as a Streamlit dashboard

CAS-Net: Multimodal Sexism Detection (EXIST 2026) | *NLP, Computer Vision* **May 2026**

- Assembled CAS-Net, a context-aware network fusing text (XLM-RoBERTa), image (CLIP), and physiological signals
- Designed a gated fusion layer boosting F1-Macro by up to 15%, reaching 0.7102 on the test set
- Integrated a RAG module to keep predictions auditable and traceable

Clinical Disease Predictive Model | *Machine Learning* **Mar 2026**

- Fit Random Forest classifier on noisy, imbalanced clinical data, reaching 0.58 Average Precision

Skills

Programming: Python, R, SQL, Go, Java

AI & ML: PyTorch, Scikit-Learn, MLflow, NLP, Computer Vision (CLIP), Time Series, RAG, CLIPS

Cloud & Data: AWS, Docker, Streamlit, Relational/NoSQL Databases, Neo4j

Other: Tableau, Power BI, Agile Methodology, Spanish (Native), English (C1, TOEFL)

Leadership & Extracurricular Experience

Co-Organizer, CDTM Tech Leaders Summit

- Co-organized an invite-only networking summit connecting founders, corporates, and investors

Former Treasurer & Board Member, ACM UPV Chapter

- Managed chapter budget and helped organize events for student branch

Environmental Volunteer, SEEDS Iceland (Trash Hunting Program)

- Cleaned coastal and wilderness sites across Iceland as part of an international volunteer team
